Disposal of Waste Products

All items containing bodily fluids such as blood, vomit, or urine will be disposed of via the 'sanitary bins' located in the ladies staff toilet located in the school. The contents of the bins will then be correctly disposed. If there is any spilt blood or bodily fluids then it must be cleaned using disposable towels and the area washed with a mixture of detergent and bleach.

All cleaning items should be stored out of the reach of children and stored and used in accordance with COSHH guidelines.
